

QUICK HISTORY

Originally trading as Raslu (Pty) Ltd & registered in 2002 by Company Owners, Michael & Eric Basson, the company needed to expand as well as modernise its business practices.

Established Magnum Aggregates in 2019. Magnum Aggregates moved from exclusively providing providing Readymix Concrete to being able to offer Slag, Sand, Bricks + other Aggregates to customers.

Not only has the service offering expanded but the company has grown to such an extent that Mobile Concrete Plants have been made possible as a value adding element for customers with large on-site concrete needs.
